

Steel grinding, cutting, chopping, & torching...common activities on the job site...

When we have sheathing, air barriers, insulation, and flashing installed, these need to be considered finished components on the building and treated as such.

WELDING NO BLANKET

DIRECTION OF SHARDS

RUST FROM GRINDING ABOVE ON WINDOW SILL

Talk to your Steel & CFMF contractor about properly protecting the building finishes during the entire construction process. BLANKETS, PLACEMENT OF CHOP SAWS, AND GRINDER AWARENESS MUST BE REVIEWED EACH DAY

THE DAMAGE IS HARD TO REPAIR & LIKELY TO GET COVERED UP!
