

**We need to protect our waterproofing from damage from backfilling.**

**Drainage board needs to be properly covered with fabric at the top in order to prevent debris from getting into the drainage cavities.**

**Stones, Screws, Silt, Etc. will damage the waterproofing & drainage board...and fill the drainage board with debris.**

**Talk to your waterproofing & backfilling Contractors and determine the best long term way to protect the waterproofing during construction. *Place the cost to protect in your scope!***
